

economic growth. We owe that in the developed world to ourselves and, equally, to those in the developing nations. Many of the technologies that will help us to meet the new air quality standards can also help us to address climate change. This is a challenge we must undertake immediately and one in which I personally plan to play a critical role.

In the United States, in order to do our part, we have to first convince the American people and the Congress that the climate change problem is real and imminent. I will convene a White House Conference on Climate Change later this year to lay the scientific facts before our people, to understand that we must act, and to lay the economic facts there so that they understand the benefits and the costs. With the best ideas and strategies and new technologies and increased productivity and energy efficiency, we can turn the challenge to our advantage.

We will work with our people, and we will bring to the Kyoto Conference a strong American commitment to realistic and binding limits that will significantly reduce our emissions of greenhouse gases.

I want to mention three other initiatives briefly that we are taking to deal with climate change and to advance sustainable development here and beyond our borders.

First, to help developing nations reduce greenhouse gas emissions, the United States will provide \$1 billion in assistance over the next 5 years to support energy efficiency, develop alternative energy sources, and improve resource management to promote growth that does not have an adverse effect on the climate.

Second, we will do more to encourage private investment to meet environmental standards.

The Overseas Private Investment Corporation will now require that its projects adhere to new and strengthened environmental guidelines, just as our Export-Import Bank already does and as I hope our allies and friends soon will. Common guidelines for responsible investment clearly would lead to more sustainable growth in developing nations.

Third, we must increase our use of new technologies, even as we move to develop more new technologies. Already, we are working with our auto industry to produce cars by early in the next century that are 3 times as fuel-efficient as today's vehicles. Now we will work with businesses and communities to use the Sun's energy to reduce our reliance on fossil fuels by installing solar panels on one million more roofs around our Nation by 2010. Capturing the Sun's warmth can help us to turn down the Earth's temperature.

Distinguished leaders, in all of our cultures we have been taught from time immemorial that, as Scripture says, "One generation passes away and another comes, but the Earth abides forever." We must strengthen our stewardship of the environment to make that true and to ensure that when this generation passes, the young man who just spoke before me and all of those of his generation will inherit a rich and abundant Earth.

Thank you very much.

NOTE: The President spoke at 6:30 p.m. in the United Nations General Assembly. In his remarks, he referred to General Assembly President Razali Ismail and U.N. Secretary-General Kofi Annan.

Statement on the Supreme Court Decision on the Line Item Veto

June 26, 1997

I am very pleased with today's Supreme Court decision that turned back the challenge to the line item veto. This decision clears the way for the President to use this valuable tool for eliminating waste in the Federal budget and for enlivening the public debate over how to make the best use of public funds.

The line item veto enables Presidents to ensure that the Federal Government is spending public resources as wisely as possible. It permits the President to cancel discretionary spending, new entitlement authority, and certain types of tax provisions that benefit special interests at the expense of the public interest.

The line item veto is also a practical and principled means of serving the constitutional balance of powers. This new authority brings us closer to the Founders' view of an effective executive role in the legislative process. With it, the President will be able to prevent Congress from enacting special interest provisions under the cloak of a 500- or 1,000-page bill. Special interest provisions that do not serve the national interest will no longer escape proper scrutiny.

I was pleased to work with Congress to secure an historic agreement to balance the budget. The line item veto will help to keep the budget in balance and provide us with added discipline by ensuring that, as tight budgets increasingly squeeze our resources, we put our public funds to the best possible uses.

I intend to use it whenever appropriate, and I look forward to using it wisely.

Statement on the Supreme Court Decision on the Communications Decency Act of 1996

June 26, 1997

Today the Supreme Court ruled that portions of the Communications Decency Act addressing indecency are not constitutional. We will study its opinion closely.

The administration remains firmly committed to the provisions—both in the CDA and elsewhere in the criminal code—that prohibit the transmission of obscenity over the Internet and via other media. Similarly, we remain committed to vigorous enforcement of Federal prohibitions against transmission of child pornography over the Internet and another prohibition that makes criminal the use of the Internet by pedophiles to entice children to engage in sexual activity.

The Internet is an incredibly powerful medium for freedom of speech and freedom of expression that should be protected. It is the biggest change in human communications since the printing press and is being used to educate our children, promote electronic commerce, provide valuable health care information, and allow citizens to keep in touch with their Government. But there is material on the Internet

that is clearly inappropriate for children. As a parent, I understand the concerns that parents have about their children accessing inappropriate material.

If we are to make the Internet a powerful resource for learning, we must give parents and teachers the tools they need to make the Internet safe for children.

Therefore, in the coming days, I will convene industry leaders and groups representing teachers, parents, and librarians. We can and must develop a solution for the Internet that is as powerful for the computer as the V-chip will be for the television and that protects children in ways that are consistent with America's free speech values. With the right technology and rating systems, we can help ensure that our children don't end up in the red light districts of cyberspace.

NOTE: The Communications Decency Act of 1996 is title V of Public Law 104–104.

Statement on the Supreme Court Decision on Physician-Assisted Suicide

June 26, 1997

I am very pleased with today's Supreme Court decision which accepted my administration's position that States may ban physician-assisted suicide. The decision is a victory for all Ameri-

cans—it prevents us from going down a very dangerous and troubling path on this difficult and often agonizing issue.
